WHEREAS the Canadian National Railway Company, acting as managers and operators of the Canadian National Railways, has received a proposal in response to public advertisements from Mr. David Lebel for the redevelopment of the station grounds of the Canadian Government Railways at Rivière du Loup, Province of Quebec, consisting of the construction of a new station and servocentre facility;

SCHEDULE

That the railway station at Rivière du Loup, which was built in 1867 as a terminal for the Intercolonial Railway, did not meet the Railway's present requirements for office space to accommodate a servocentre; that, because of the building's age and obsolescence, it was considered uneconomical and impractical to expend about \$80,000 to renovate it for such use; that the alternative was the construction by this company of a new station and servocentre facility at an estimated cost of \$295,460; and that, in order to avoid a capital expenditure of this magnitude, proposals for the redevelopment of the station grounds, with a lease-back to the Railway of the building, had been invited by published advertisement;

That of four proposals received, the offer submitted by Mr. David Lebel, a local contractor of Rivière du Loup, was the most attractive; and that the Regional Manager of Real Estate recommended -with the concurrence of the Vice-President, Atlantic Region, and the General Manager of Real Estate- acceptance of the offer of Mr. Lebel and the entering into in this connection of ground and building leases on the undernoted principal terms and conditions:

Criteria Determining Eligibility for Duty Remission

- A. In respect of goods classifiable under Tariff Item 41100-1, the Machinery and Equipment Advisory Board will be guided by the criteria attached to Order-in-Council P.C. 1967-2301 of 12th December, 1967.
- B. In advising on applications for machinery and equipment for use in the automotive industry, the Board will be guided by the following criteria:

(1) Eligibility

The machinery or equipment in respect of which remission of duty is sought should be for use in the manufacture of original equipment parts or accessories or parts thereof for motor vehicles, or for use in the manufacture of tooling for the production of such parts or accessories for motor vehicles.

(2) Availability

Machinery or equipment should be deemed available in Canada if at least one manufacturer can satisfy the Board that it has the ability and capacity to manufacture machinery or equipment comparable in physical qualities, operational characteristics, and efficiency to that machinery or equipment available abroad for which remission of duty is being sought and, provided that an order is placed with the machinery manufacturer at the earliest practicable time, the machinery manufacturer can reasonably meet the delivery time required. Because of the need to meet tightly scheduled automotive commitments, the timing factor should be regarded by the Board as a critical consideration.

(3) Automotive Program Objectives

The use of the machinery and equipment in respect of which remission of duty is sought would result in the improvement of the productive capability of the industry.
